- Experience** **Computer Systems Analyst, General Marketing Solutions, LLC Eden Prairie, MN**
From January 2009 to date
- Duties include analyze, design and recommend changes to existing Database systems and plan to update them to make them both simpler, less expensive to maintain and more efficient, as a result. Recommend solutions for BI and SSIS packages, data import and Export. Supervise hardware and software upgrades as needed.
- Owner/Chief Systems Analyst/Chief Software and Hardware Consultant, Data Magic Solutions, Inc, Winnipeg, MB, Canada**
From December 2002 to January 2009
- Main duties have included analyzing clients' needs and finding solutions to their IT and data problems. The company's main service lines are custom end-to-end, business-to-business computer systems. We provide data import-export and data warehouse solutions, also complete web-integrated IT solutions which are at industry standard levels. Duties also include data security analysis and recommendations for software or hardware upgrades to our clients. Despite its relatively small size the company retains many satisfied clients, both in US and Canada, including Northwest Airlines, Ameriprise Financial, Andersen Windows, Mars Hill Group, and Dycom Inc.
- Programmer/Systems Administrator Midwest Graphics and Response Systems Inc, Minneapolis, MN**
From January 1999 to December 2002
- Duties included Windows NT network support, such as user maintenance, backups, troubleshooting, and help desk support. Network support included 10+ Windows NT and Terminal servers, a WAN connection between two company locations and 50+ Windows NT workstations. Two Citrix and Terminal Servers served 200+ remote users. I have experience in building and maintaining firewall or proxy servers for both on NT and UNIX platform, implemented security for Windows networks, and programmed. I have been involved as a programmer in the development effort on several projects. Essential experiences in developing Client/Server applications on MS SQL platform have been by using VB, MS Access/VBA and Visual C++ applications as a front end. I have participated in the design and construction of a Job Tracking system, Northwest Airlines fulfillment, BizPerks and certificates project, MLT Vacations fulfillment project, American Express and US Bancorp lead management systems.
- Technical Skills** Visual Basic (14 years), MS Access (14 years), MS SQL Server (14 years), C# - 2 years, Queuing Theory and Applications (14 years), Internet Applications (11 years)
- Languages** English, Russian, Georgian
- Interpersonal** Excellent oral and written communication on any known languages, excellent teaching and presenting skills
